Web Projects Manager

The Montana Natural Heritage Program (NHP) is recruiting for a Web Projects Manager. The Web Projects Manager is responsible for leading the development and management of web services that deliver the NHP's extensive databases and other information resources to support resource management and environmental planning, as well as natural history education and recreation. The position is responsible for providing leadership in the overall development of the NHP's web presence, services and functions. This responsibility includes envisioning, designing, and delivering web applications that integrate database-to-web connectivity, interactive mapping, site security, and extensive graphics, as well as for the testing, monitoring and maintenance of those applications. S/he also provides expertise in developing and maintaining a variety of auxiliary databases and software applications. The Web Projects Manager is supervised by the Systems and Services Manager and is expected to supervise one or more programmers and/or contractors, as needed.

The Montana Natural Heritage Program (http://mtnhp.org), operated by The University of Montana with the Montana State Library, is part of a hemispheric network of over 80 programs that maintain and disseminate data on the distribution, status and management of vulnerable species and important habitats. NHP is part of the Montana Natural Resource Information System (NRIS), a nationally-recognized leader in using emerging GIS and Web technologies to integrate and distribute spatially referenced data on natural resources (http://nris.mt.gov/).

Qualified candidates will possess a Bachelor's Degree in an appropriate field (or equivalent experience) and at least four years of progressively responsible work experience. Familiarity with Natural Heritage Program methods and databases preferred.

Salary range $40,000 to $50,000.
